

Tremors: Perfection Valley

PLAYTEST PACK · 32-NODE VALLEY BOARD · ONE DEATH ENDS IT

Cooperative, solo-friendly, 1–4 players, 60–90 minutes. Run Val, Earl, Rhonda and Burt through fourteen rounds in Perfection. Every action makes noise. Noise brings the Graboids up. Finish the essential work, keep everyone alive, and get out.

What this pack is

Everything currently designed for the game, consolidated for a physical playtest. The **Core rules** (Part 3) are the ruleset enforced by the digital prototype (`js/engine.js`) transplanted onto the 32-node valley board. The **Modules** (Part 4) are design proposals merged from the Gemini movement spec; they are untested and are what the playtest is meant to judge. Part 6 is the test protocol.

Source of truth for cards: `js/data.js`. Board: `scripts/valley_network.py`. Design docs: `docs/rules-valley.md`, `docs/valley-engine-checklist.md`. Pack version: 2026-09-02 · 14 rounds · calamity 4/7/10/12/14 · evacuate 10+.

CONTENTS

1. The board — map, symbol and colour key, sectors, fault lines, gazetteer	APPENDICES
2. Components and setup	A. Character sheets (4) and Burt's kit
3. Core rules	B. Objective deck (17 + setup card)
4. Optional modules and variants	C. Calamity deck (30 + setup card) and node translation table
5. Example turn	D. Item deck (16), rig reference (5), Burt's kit cards (6)
6. Playtest protocol	E. Graboid Behaviour deck (12, Module M5)
	F. Play aids — round log, Hunt and sector trackers, token list

PRINT GUIDE

Pages	Paper	Notes
Cover, Parts 1–6	Plain, duplex	Rules text is two-column and reads front-to-back. Keep Part 3 and Appendix F at the table.
Map page (Part 1)	Single sheet, highest quality	Letter or A4. For a larger board print <code>docs/Perfection_Valley_Full_Board_Map.png</code> at 11×17 / A3 (it is 300 DPI at 18×22 in).
Appendices B–E	Card stock or plain + sleeves	Poker size, 3×3 per page, cut on dashed lines. Single-sided.
Appendix A, F	Plain	One character sheet per player. Print two copies of the round log.

Designed for US Letter; scales to A4 with "fit to page". Total: 31 pages including cards.

1. The Board

PERFECTION VALLEY — 32 NODES, 40 ROUTES, 3 FAULT LINES

SYMBOL AND COLOUR KEY

Symbol	Terrain	Humans	Graboids
 Red circle	Exposed Dirt	Open ground. Full risk. Roads marked N+ are loud (+1 Noise, see gazetteer).	Free travel. May surface and attack here.
 Cyan square	Micro-Safe Roof	Trailer or small house. Holds 1–2 people. Protects once (Compromised), then Unsafe.	Cannot burst through the floor on the first try. Can undermine.
 Blue square	Fortified Hub	Big building. Any number of people. Search hub. Protects once (Core) or takes 3 Erosion (Module M3).	Structural attack only.
 Grey hexagon	Safe Boulders	Pole-vault rocks. Slow but safe: 1 node per step, cannot Run through.	Impassable. Never surfaces here; a surfaced model cannot enter.
 Green triangle	Safe High Ground	Tower. One person per ladder step. Cannot be grabbed while up.	Impassable. Open ground below becomes Unsafe when tested.
 Orange diamond	Search Hub	Objective and loot site. Search rating 2–4. Treated as Exposed Dirt for safety unless noted.	Free travel.
 Purple star	Hazard / Trap	Cliff Edge. Bait ground for the stampede gambit. Loud (+1).	A Graboid that enters N32 falls. Remove it (Module M4).
 Solid black line	Route	Walkable connection. One step per node.	Surfaced models move along routes too.
 Dotted red line	Fault line	Not walkable.	Underground shortcut (N04 ↔ N26, N09 ↔ N27, N22 ↔ N31). Matters in Module M1.

Sectors CORE GRABOID TRACKING

Underground Graboids are tracked by **sector**, not node. A sector's noise is the sum of lingering noise on its nodes.

Sector	Nodes	Adjacent
A North Canyon	N01, N02, N03, N04, N09, N10	B C D
B Town Centre	N11, N12, N13, N14, N15, N16, N17, N18, N19, N20, N21, N24, N25	A C D E
C West Compound	N06, N07, N08, N26, N27, N28, N29	A B D E
D East Yard	N05, N22, N23	A B C E
E South Cliffs	N30, N31, N32	B C D

Fault lines

N04 Canyon Rd South ↔ N26 West Flat East · N09 Canyon Rd Mid ↔ N27 West Flat Gate · N22 Bulldozer Site ↔ N31 Cliff Approach. In Core play these are cosmetic (sectors are already adjacent). In **Module M1** a Graboid may transit a fault line as one step.

Solid Rock

Boulder and tower nodes are always safe from surfacing. **Find the Safe Ground** (objective) additionally reveals the Junkyard foundations (N23) as Solid Rock.

Loud ground

Nodes marked **N+1** in the gazetteer add 1 Noise to any action there except a careful Move. Metal and the cliff road carry sound.

GAZETTEER

S = Search rating (added to Search rolls). N+ = loud ground. Legacy ID is the name used inside the engine and on some calamity cards; see the translation table in Appendix C.

ID	Name	Terrain	Sec	S	Loud	Legacy ID	Notes
N01	Edgar's Tower	Safe High Ground	A	2		edgar	
N02	Roadworks / Tel Cut	Search Hub	A	4		radio	Objective: Get the Radio Working
N03	Old Fred's Farm	Search Hub	A	4		old_fred	
N04	Canyon Rd South	Exposed Dirt	A	1		canyon_south	
N05	Dr. Jim's Homestead	Search Hub	D	4		clinic	Objective: Recover the Medical Supplies
N06	Horse Path 1	Safe Boulders	C	1		school	Objective: Save the Horses
N07	Horse Path 2	Safe Boulders	C	1		rhonda	Rhonda starts. Objective: Find Rhonda's Seismograph; Rhonda — Something Doesn't Add Up
N08	Horse Path 3	Safe Boulders	C	1		horse_path_3	
N09	Canyon Rd Mid	Exposed Dirt	A	1		canyon_mid	
N10	Canyon Rd North	Exposed Dirt	A	1		canyon_north	
N11	Val & Earl's	Micro-Safe Roof	B	2		val_earl	
N12	Chang's Trailer	Micro-Safe Roof	B	2	N+1	fuel	Objective: Gather Fuel
N13	Water Tower	Safe High Ground	B	2		water	
N14	Chang's Store	Fortified Hub	B	3		store	Val, Earl start. Objective: Get Everyone to the Meeting Point; Raid Chang's Market
N15	Melvin's Shack	Micro-Safe Roof	B	2		bar	Objective: Val & Earl — Don't Wait Around
N16	Nestor's Trailer	Micro-Safe Roof	B	2		trailer	Objective: Salvage the Trailer
N17	Main St South	Exposed Dirt	B	1		main_south	
N18	Main St Central	Exposed Dirt	B	1		main_central	
N19	Main St North	Exposed Dirt	B	1		main_north	
N20	Melvin's Trailer	Micro-Safe Roof	B	2		melvin_trailer	
N21	Quonset Bldg	Fortified Hub	B	3		quonset	
N22	Bulldozer Site	Search Hub	D	2	N+1	caterpillar	Objective: Secure a Heavy Vehicle
N23	Junkyard	Exposed Dirt	D	3	N+1	workshop	Objective: Find the Safe Ground. Solid Rock when found
N24	Nancy's House	Fortified Hub	B	3		nancy	Objective: Nancy — Where's Mindy?
N25	Abandoned Cottage	Micro-Safe Roof	B	2		cottage	
N26	West Flat East	Exposed Dirt	C	1		west_flat_e	
N27	West Flat Gate	Exposed Dirt	C	1		west_flat_gate	
N28	Gummer Gate	Fortified Hub	C	3		burt_gate	
N29	Gummer Armory	Fortified Hub	C	3		burt	Burt starts. Objective: Burt's Arsenal; The Basement; Burt — Prepared
N30	Cat Path	Safe Boulders	E	1		cat_path	
N31	Cliff Approach	Safe Boulders	E	1		cliff_approach	
N32	Cliff Edge	Hazard / Trap	E	0	N+1	highway	Objective: The Road Is Blocked

2. Components and Setup

TEN MINUTES FROM BOX TO FIRST TURN

COMPONENTS

- **Board:** the map (Part 1).
- **4 character sheets** (Appendix A) and 4 standees or meeples.
- **Graboid pieces:** 4 underground tokens (one per worm, marked G1–G4) and 4 surfaced models.
- **Hunt tracker** (Appendix F): one row per Graboid, 0–3.
- **Noise:** about 40 small cubes for node noise, and a round-noise track 0–25 with a marker.
- **Tokens:** 4 Rescue, 3 Medkits, 2 Quiet Move (gained in play), Compromised / Unsafe markers (10), Blocked Route markers (6), Tremor markers (6), Wound markers (8), Erosion tokens (12, Module M3 only), Desperation and Aggression markers.
- **Condition markers** per character: Shaken, Injured, Critical (with 2-round timer), Pinned, Threatened (one colour per Graboid), Grabbed.
- **Decks:** Objectives (17), Calamities (30), Items (16), Rig reference (5), Burt's kit (6), Behaviour (12, Module M5).
- **Two d6.**
- **Round log** (Appendix F) and a pencil.

SETUP

1. **Board.** Lay the map flat. Put the round marker on 1 and the round-noise marker on 0.
2. **Characters.** Val and Earl start at **N14 Chang's Store**. Rhonda starts at **N07 Horse Path 2** (her seismograph stakes). Burt starts

at **N29 Gummer Armory**. All Healthy, 2 actions each.

3. **Burt's kit.** Shuffle the 6 kit cards, deal 3 face up, Burt keeps 2.
4. **Shared supply.** 4 Rescue tokens, 3 Medkits. No items yet. Shuffle the item deck face down.
5. **Objectives.** Shuffle the three piles separately. Draw **3 Essential, 2 Optional, 1 Character**. Lay them face up; mark their nodes with a small token.
6. **Calamities.** Separate by act. Shuffle each. Stack Act I on top, then Act II, then Act III with **#30 Get Out of Perfection** at the very bottom.
7. **Graboids.** Three underground tokens at **Hunt 1** in three different sectors: one in A, C or D; one in B or E; one anywhere else. Place them on the Hunt tracker, not the board — players know the sector, not the node. Fourth token and models to one side.
8. **Modules.** Decide now which of Part 4 you are testing and write it on the round log.

Turn order and pacing

Val → Earl → Rhonda → Burt, every round. In a group game each player owns a character; solo, one player runs all four. Discuss openly — the game is fully cooperative and noise is a shared budget, so table talk is the point.

Target: 14 rounds in 60–90 minutes. Rounds 1–3 should take under 5 minutes each.

3. Core Rules

WHAT THE DIGITAL PROTOTYPE ENFORCES, ON THE VALLEY BOARD

WIN AND LOSE

Win: every drawn Essential objective is complete and, from **round 10** onward, a player calls **Evacuate** with nobody Grabbed or dead. You also win if the Essentials are done when round 14 ends.

Lose: any survivor is **Dragged** (caught while Grabbed) or bleeds out from **Critical**; or round 14 ends with an Essential unfinished or failed.

THE ROUND

- 1. **Survivor phase.** Val, Earl, Rhonda, Burt each take a turn.
- 2. **Graboid phase.** Read the round-noise total → response band. Resolve each Graboid.
- 3. **Calamity** on rounds **4, 7, 10, 12, 14**. Band from the same total.
- 4. **Upkeep.** Critical timers −1. Every node's noise −1. Round noise to 0. Advance the round marker.

ACTIONS

Each character has **2 actions** (1 if Injured, Pinned or Grabbed; 0 if Critical). A Grabbed character's only action is **Struggle**. Unused actions are lost.

Every action costs at least 1 Noise, placed on the node where it happens and added to the round total. Exceptions: Rhonda's **Don't Move**, and spending a **Quiet Move** token.

Action	Noise	Rule
Move carefully	+1	1 node. Ignores loud ground and Shaken.
Move	+1	Up to Movement nodes along routes. Shaken: +1.
Run	+2	Up to Movement+1 nodes. Not through boulders. Shaken: +1.
Quiet Move	0	Spend a token. Move as above.
Search	+1	d6 + Search + node S ≥ 9 (+1 to the target per earlier success here). Success: draw an item to the shared supply.
Work	max(1, printed)	On the objective's node. Tick 1 Work. Complete at the printed Work.
Diversion	+3	Place all 3 on an adjacent node instead of your own.
Fight	+3 (+2 heavy)	Surfaced Graboid on your node. d6 + Combat ≥ 8 = 1 wound. On a miss, it attacks you.
Rescue	+2	Share the node. Spend a Rescue token. Pull them one node clear; grip broken. You become Shaken.
Struggle	+1	Grabbed only. Pull yourself one node clear; grip broken. Shaken.
Aid	+1	Share the node. Spend a Medkit: Critical → Injured or Injured → Healthy. Or help up a Pinned character (no Medkit).
Use item / Rig	floor 1	See Appendix D. A rig spends two specific items as one action.
Stay quiet	+1	End your turn. Remaining actions lost.
Evacuate	—	Round 10+. All Essentials passed. Nobody Grabbed or dead. Win.

Loud ground. On an N+1 node every action except a careful Move costs +1 Noise.

Blocked routes cannot be walked. **Unsafe** nodes give no protection. **Inaccessible** nodes cannot be entered.

NOISE BANDS

After the four turns, read the round total.

Total	Response	Graboid phase effect
0–8	Quiet	No underground movement. Hunt still ticks.
9–11	Movement	Each underground worm shifts one sector toward the loudest sector.
12–14	Hunting	Movement, and every underground worm +1 Hunt before the tick.
15–19	Feeding Frenzy	Hunting, then every worm activates a second time.
20+	Stampede	Frenzy, and a fourth Graboid enters an empty sector at Hunt 1.

Calamity severity uses the same total: **Quiet 0–8 • Disturbed 9–14 • Frenzy 15+**. A full careful round for four people is about 8, so Quiet means "do less".

GRABOID PHASE

Resolve each Graboid in ID order. Underground tokens first use the band, then **tick Hunt**. Surfaced models **chase**.

Underground token

- 1. **Band movement** (Movement or higher): if the loudest sector on the board is adjacent, move there; otherwise move one sector toward it. Stay if you are already in it.
- 2. **Hunting or higher:** +1 Hunt.
- 3. **Hunt tick** from the sector's lingering noise: **0–4** → **+1**, **5–7** → **+2**, **8+** → **+3**, plus the Aggression marker. Hunt caps at 3.
- 4. **Hunt 2 or more** → **Surface**. Place the model on the **loudest node in that sector**. Ties: random (d6). Never on boulders, towers, or known Solid Rock — if the loudest legal node is none, pick the loudest legal one; if there is none, the worm stays down at Hunt 2.

Surfacing ambush. If anyone is on the burst node: on Exposed Dirt or a Search Hub, the most vulnerable person there (Grabbed, then Threatened, then Injured, then Healthy) is **caught** (see Encounter). In a building the walls hold once — mark it **Compromised**, everyone inside is Shaken. A Compromised building that is hit again becomes **Unsafe** and its occupants are caught. On a tower nobody is caught; the ground beneath becomes Unsafe.

Tripwire Bait overrides the burst node and skips the ambush.

Surfaced model

- 1. **Chase:** move 1 node along routes toward the nearest living character (shortest path, not through boulders or towers, not along blocked routes). Frenzy and Stampede: it activates twice, so 2 nodes.
- 2. **Catch:** after moving, every character on its node is caught.
- 3. **Miss:** if it caught nobody this round, mark a miss. On the **second consecutive miss** it **submerges** in the sector it is in at **Hunt 1**. Threatened markers from that worm are removed.

ENCOUNTER

Being **caught** by a worm escalates one step on that worm's track:

- 1. **Threatened** — first catch by *this* worm. You are Shaken. Still mobile. Leave.
- 2. **Grabbed** — caught again by the *same* worm while Threatened. Injured, Pinned, 1 action (Struggle). Rescue or Struggle pulls you one node clear and breaks the grip.
- 3. **Dragged** — caught while Grabbed. Dead. Everyone loses.

A different worm catching you starts its own track: you are Threatened by it instead.

Attacks happen when you walk onto a surfaced worm's node, miss a Fight, or Compromised/Unsafe cover fails. Roll d6:

d6	Result
1–2	Miss. Shaken.
3	Knockdown. Injured, Shaken.
4	Pinned. Injured, Threatened. Cannot move until helped up (Aid) or pulled clear.
5–6	Grabbed.

If already Threatened by that worm: 4+ is Grabbed. If already Grabbed: no roll, Dragged. **Burt's Prepared for Anything:** once per round, discard one kit card to cancel an attack or breach at his node.

HEALTH

Healthy → **Injured** → **Critical** → **Dead**. Injured: 1 action. Critical: 0 actions, a 2-round timer, then dead unless Aided with a Medkit. Val is Fragile: her second serious hit takes her straight to Critical. **Shaken** is separate: +1 Noise on any Move or Run that is not careful. Earl's Keep Moving clears Shaken from a friend.

KILLING A GRABOID

2 wounds. It dies, the model is removed, and **+6 Noise** lands on that node immediately. Everyone Threatened or Grabbed by it is released. **Aggression +1** (all future Hunt ticks are one higher). The token returns underground in a random other sector at Hunt 0 later — the valley does not run out of worms.

OBJECTIVES

Draw **3 Essential, 2 Optional, 1 Character** at setup. Work them **on the printed node**. Each Work action ticks 1; the card is passed at its Work value and its **Pass** text applies at once. A card **fails** only when a calamity or its own text says so (Urgent, No Signal, Perfection Falls); then its **Fail** text applies. Failure is never an instant loss — it changes the board.

Radio Parts count as +1 Work on the radio or loader objective at their node.

SEARCH AND ITEMS

Search: **d6 + Search + node S ≥ 9**. Each success at a node raises that node's target by 1 for the rest of the game. Val may reroll once per round (Luck); if the reroll also fails, +1 Noise. Success draws the top item card into the **shared supply**; anyone anywhere may use supply items on their turn.

Items are minor alone. **Rigs** spend two named items in one action for a big effect. Both are listed on the cards in Appendix D. The signature play is **Tripwire Bait**: you choose where the next worm surfaces and it arrives with no ambush.

CHARACTERS

Stats are **Movement / Nerve / Search / Combat**. Each character has passives and one **Signature Moment** (once per game). Full text in Appendix A. Nerve is printed for future rules and is not used in Core.

Character	M/N/S/C	Start	Weakness
Burt Gummer	2/4/3/5	N29 Gummer Armory	Heavy Equipment: +1 Noise when using equipment.
Val McKee	4/3/3/3	N14 Chang's Store	Fragile under pressure. Critical after a second serious hit.
Earl Bassett	3/5/2/3	N14 Chang's Store	Low specialist ability. Needs the others nearby to shine.
Rhonda LeBeck	3/3/5/2	N07 Horse Path 2	Combat 2. She is not here to shoot Graboids.

Rhonda's Seismologist: the first time the round total reaches the Noise Limit (starts 6, drops by 1 per Graboid killed, minimum 4)

she may look at the top calamity and either leave it or bury it at the bottom. Once per round. She cannot bury while Injured.

Earl Knows When to Run: once per round, after another character makes noise, Earl may move 1 node toward that node for free.

CALAMITIES

Draw the top card on rounds **4, 7, 10, 12, 14**, after the Graboid phase. The stack is ordered by act, so round 4 is Act I, rounds 7 and 10 Act II, round 12 Act III and round 14 is **#30 Get Out of Perfection**. Read the paragraph matching the round's noise band. Cards name town locations; use the translation table in Appendix C for valley node IDs.

Desperation and **Aggression** are markers some cards raise. Desperation is a story counter for now (it has no rule effect in Core). Aggression adds to every Hunt tick.

TREMORS

Some cards place a **Tremor marker** on a node. Rhonda's **I Know Where It Is** lets her spend an action at that node or in its sector to reveal any Graboid there (sector, Hunt, or surfaced node). Tremors are information, not danger.

Rules of thumb for a first game

- Under 9 total noise and the worms do not move sectors. Over 14 and everything comes up hungry.
- A surfaced worm moves 1 node a round. Running 2 nodes away buys one round; running 3 buys two. Two misses and it goes down.
- Never end a turn Threatened on the same node as the worm that threatened you.
- Loud ground (N+1) doubles the cost of quiet work. The CAT and the junkyard are noisy by design.
- Four Rescue tokens is the whole game. Spend them; do not hoard them.

4. Optional Modules and Variants

UNTESTED PROPOSALS FROM THE MERGED VALLEY SPEC — PICK PER SESSION

Each module replaces or adds a rule. Play Core first. Add one module per session unless the protocol says otherwise. Modules M1–M5 come from the Gemini movement spec; variants V1–V3 come from issues found in the digital prototype.

M1 — Node-tracked Vector Hunt REPLACES SECTOR TRACKING

Underground tokens sit on a **node**, hidden under a face-down marker (players may peek only via Rhonda or items). Each Graboid phase:

1. **Vector Hunt** (Movement band or higher): move up to **3 nodes** along the shortest legal path toward the loudest node on the board. Legal: any route, plus **fault lines**; never boulders or towers.
2. **Drift** (Quiet band): move 1 node continuing your last direction. If blocked, turn to the nearest legal node clockwise. After two consecutive Quiet rounds, drift toward the nearest human on Exposed Dirt instead.
3. **Hunt tick** uses the noise on the token's node and its neighbours (sum), same thresholds as Core.
4. **Surface** on the token's own node.
5. **Ties**: continue straight → fewer hops → more humans → clockwise from north.

Tests: do players count hops and plan? Is the hidden token workable without an app?

M2 — Noise spillover ADDS

When a single action puts **3 or more** Noise on a node (Run, Diversion, Fight, rigs), also place noise on neighbours: **–1 per hop** until 0. Spillover through boulder or tower nodes is blocked. The round total includes spillover cubes.

Tests: does clustering feel dangerous? Is the cube count manageable?

M3 — Erosion REPLACES COMPROMISED/UNSAFE

Buildings take **Erosion tokens** instead of a one-way Compromised flag. Each surfacing or attack under a Micro-Safe Roof or Fortified Hub adds **1 Erosion**; occupants roll the attack table at –1 (Roof) or are safe (Hub) while Erosion is below 3. At **3 Erosion** the building collapses: it becomes Exposed Dirt, everyone inside is Injured and caught. Rebuilding is not possible; Field Generator does not clear Erosion.

Tests: is a siege in Chang's Store tense over several rounds, or just slow?

M4 — Alternate win paths ADDS

Semi-Truck Escape. Two new Key Items shuffle into the item deck: **Truck Battery** and **Starter Motor** (only drawn when searching at N22 or N23; redraw elsewhere). Carry both to **N04 Canyon Rd South** and spend **4 Work** there (printed noise 3). Then Evacuate is legal from round 8, with everyone at N04 or adjacent, even if an Optional is unfinished — Essentials are still required.

Bixby Cliff Trick. A surfaced Graboid that chases onto **N32 Cliff Edge** falls and is removed permanently (no +6 Noise, no return). If every Graboid on the board is dead or fallen, and all survivors stand on Safe Boulders or Safe High Ground, you win immediately.

Tests: does anyone attempt them? Do they make Burt and the CAT matter?

M5 — Graboid Behaviour deck ADDS

Shuffle the 12 behaviour cards (Appendix E). Whenever the round total is **Disturbed or higher**, draw one after band movement and before Hunt ticks. Resolve the **Seismic** line first (a map mutation), then apply the **AI** line to every Graboid for this phase only. Discard after use.

Tests: too much admin? Do the mutations create memorable moments or just confusion?

V1 — Hunt cooling VARIANT

A sector with **0** lingering noise gives **–1 Hunt** (minimum 0) instead of +1. This is what the design intended; the prototype currently ticks +1 in silence, which means all three worms surface at the end of round 1 regardless of play. *Test both*.

V2 — Building ambush VARIANT

Surfacing under a building ignores cover: someone inside is caught immediately (the prototype does this). Core uses "walls hold once". *Test which reads better*.

V3 — Two-step chase VARIANT

Surfaced models chase 2 nodes on Hunting and above, 3 on Frenzy. *Use if running away is too cheap*.

5. Example Turn

ROUND 1 IN FULL, THEN AN ENCOUNTER IN ROUND 6

Core rules, no modules. Objectives drawn: **Get the Radio Working** (N02), **Secure a Heavy Vehicle** (N22), **Get Everyone to the Meeting Point** (N14); Optional **Gather Fuel** (N12) and **Save the Horses** (N06); Character **Rhonda** — **Something Doesn't Add Up** (N07). Burt drafted Shotgun and Binoculars. Graboids: G1 sector D, G2 sector E, G3 sector B, all Hunt 1.

ROUND 1 — SURVIVOR PHASE

Val (M4). Move N14 → N18 → N21 Quonset (3 nodes, within Movement 4). +1 Noise at N21. Then **Search** at N21 (S3): d6 4 + Search 3 + 3 = 10 ≥ 9. Success — draws **Radio Parts** into the supply. +1 at N21. *Val: 2 Noise.*

Earl (M3). Move N14 → N18 → N21 to join Val (+1 at N21). Search N21 (target now 10 after Val's find): d6 3 + 2 + 3 = 8. Fail. +1 at N21. Earl and Val share a node, so both have +1 Nerve (no Core effect). *Earl: 2 Noise. N21 now holds 4.*

Rhonda (M3). Takes no Move, so **Don't Move** applies. **Work** on *Something Doesn't Add Up* at N07 (Work 1, printed noise 0 → floor 1 → Don't Move makes it 0). Complete: she reveals two worms — G1 is in D at Hunt 1, G3 is in B at Hunt 1. Second action: Search N07 (S1): d6 2 + 5 + 1 = 8. Fail, +1 at N07. *Rhonda: 1 Noise.*

Burt (M2). Move N29 → N28 → N27 (+1 at N27). Move carefully N27 → N26 (+1 at N26). *Burt: 2 Noise.*

Round total 7 → QUIET (0-8)
Node noise N21:4 N07:1 N27:1 N26:1
Sector noise A:0 B:4 C:3 D:0 E:0

ROUND 1 — GRABOID PHASE

G1 (D, Hunt 1). Quiet band: no sector move. Tick: D has 0 noise → +1. **Hunt 2 → surfaces.** Loudest node in D: N05, N22, N23 all at 0 — tie, roll d6 → **N23 Junkyard**. Nobody there. Model placed. Junkyard is loud ground, so anyone who works near it later will be heard.

G2 (E, Hunt 1). Tick +1 → **Hunt 2 → surfaces.** Sector E is N30, N31 (boulders — never) and N32 Cliff Edge. Model on **N32**. Nobody there.

G3 (B, Hunt 1). Tick: B has 4 → +1 → **Hunt 2 → surfaces** at the loudest node in B: **N21 Quonset**, where Val and Earl are standing. It is a building: **the walls hold once**. Mark N21 **Compromised**. Val and Earl are **Shaken**, not caught.

No calamity (round 1). Upkeep: node noise -1 (N21 → 3, the others → 0). Round noise → 0. Round marker → 2.

What the table just learned

All three worms surfaced at the end of round 1 **however quietly the table played** — Core Hunt always ticks at least +1 from Hunt 1. This is the first thing the playtest should judge (Hypothesis H4, Variant V1). Also: Val and Earl are now in a Compromised building sharing a node with a Graboid. If they are still there when G3 activates at the end of round 2, the walls fail and they are caught.

ROUND 2 — THE DECISION

Options on the table: **leave** (G3 chases 1 node per round, so a 2-node Move opens a gap; a Run opens more but costs +2 +1 Shaken); **Fight** (Earl: d6 + 3 ≥ 8 needs a 5+, and a miss means an attack roll); or hold and **search once more** for a second Radio Part before running. Burt is two rounds away. The group chooses to leave: Val Runs N21 → N18 → N14 Chang's Store (+2 +1 Shaken = 3 at N14) and Earl Moves N21 → N20 → N17 (+1 +1 Shaken = 2 at N17). G3 will step toward the nearest of them at the end of the round.

ROUND 6 — AN ENCOUNTER

Situation. Burt is on N17 Main St South heading for the CAT. G3 is surfaced on N18, adjacent. Burt has Shotgun and Binoculars, 2 actions, Healthy.

Burt, round 6. He cannot Fight yet — the worm must share his node. He could retreat, but he wants the shot, so he **Stays quiet** (+1) and lets it come. In the Graboid phase G3 chases N18 → N17 and **catches Burt: Threatened by G3**, Shaken.

Round 7, Burt action 1: Fight. Shotgun: Combat 5 + 2 = 7, d6 3 → 10 ≥ 8. **1 wound.** Noise: 3 (Fight) + 2 (heavy) + 1 (Burt's weakness) = +6 at N17. **Action 2:** Move N17 → N26 (+1 +1 Shaken).

Graboid phase. Round total was 14 → Hunting. G3 chases 1 node: N17 → N26 and **catches Burt again — same worm, already Threatened → GRABBED**. Burt is Injured, Pinned, 1 action next round.

Round 8, Earl (who Knew When to Run toward Burt's shotgun noise last round and is now on N17): Move N17 → N26 (+1). **Rescue:** spend a Rescue token (3 left), +2 Noise, pull Burt one node clear to N27. Grip broken; Earl is Shaken. **Burt (1 action):** Move carefully N27 → N28 Gummer Gate (+1). G3 caught nobody this round: miss 1 of 2.

If Earl had not arrived, Burt's one action would have been **Struggle** (+1, pull himself clear, Shaken) — which also breaks the grip. The difference is the Rescue token and who ends up standing next to the worm.

6. Playtest Protocol

WHAT WE ARE TRYING TO FIND OUT, AND HOW TO RECORD IT

The prototype has been simulated (~700 bot games) but never played by people at a table. Bots do not bluff, coordinate, or get scared. This protocol is built to answer questions simulation cannot.

AIMS

- Does **noise as a shared budget** produce real table negotiation, or does one player quarterback?
- Are the Graboids **unavoidable but controllable** — present every game, but shaped by what the players do?
- Is the **14-round clock** felt? Do players know what round it is without looking?
- Does the **32-node valley** add tactical texture (routes, boulders, towers) or only walking time?
- Which of the **modules** earn their complexity?

HYPOTHESES TO TEST

#	Hypothesis	Evidence that supports / refutes
H1	Human tables win 40–60% under Core.	Win rate over ≥4 games. Below 30% or above 70% means retune before testing modules.
H2	Players deliberately stay under 9 noise on some rounds and deliberately spend big on others.	Round log shows both bands. Table talk mentions the threshold.
H3	Every game has at least one Rescue or Struggle.	Log column. Zero grabs = worms not threatening enough.
H4	Round-1 mass surfacing (Core) feels wrong.	Immediate reaction; compare V1 session.
H5	Boulder paths and towers are used as intended routes at least once per game.	Track nodes visited. If never, the terrain is decoration.
H6	Sector tracking (Core) is easy but leads to worms piling onto one node under Movement+ bands.	Count rounds with 2+ worms in one sector or on one node.
H7	Fight is chosen at least once per game when Burt is present.	If never, loud play has no payoff.
H8	Act III calamities are reached in most games.	Games ending before round 12 mean the evacuate gate is too early or Essentials too cheap.

SESSION PLAN

Session	Rules	Focus
A (×2)	Core only	Baseline. Learnability, pacing, H1–H4, H7, H8.
B	Core + V1	Does Hunt cooling restore the quiet/loud choice? Compare first-surface round with A.
C	Core + V1 + M1	Node-tracked worms. H5, H6. Time the Graboid phase.
D	C + M2 + M3	Spillover and erosion. Component load; siege feel.
E	D + M4	Do people go for the truck or the cliff? Does Burt matter more?
F	E + M5	Behaviour deck. Admin cost vs memorable moments.

If a session is a clear failure (a rule cannot be applied at the table, or the game is decided by round 4), stop, note why, and replay the same configuration with the obvious fix before moving on.

ROLES AT THE TABLE

- Facilitator** reads rules, does not play, keeps the round log.
- Players** think aloud. Ask "why that action?" only after the round.
- Timer:** note the clock at the start of rounds 1, 4, 7, 10, 14.

WHAT TO RECORD EVERY ROUND

Use the round log (Appendix F). Columns:

- **Noise total** and **band**.
- **Loudest node** and whether it was deliberate (a diversion) or incidental.
- **Surfaces, catches, grabs, rescues, struggles, wounds, kills**.
- **Objective progress** (Essentials done / 3).
- **Calamity** drawn and band.
- **Clock time** at round start.
- **One line of table talk** that captures the round.

WATCH FOR DURING PLAY

Noise economy

- ☐ Did anyone say "we're at N, that puts us over"?
- ☐ Were Diversions or Tin Cans used to bait a surface on purpose?
- ☐ Did loud ground (N+1) change route choices?
- ☐ Was Rhonda's Don't Move used as the team's quiet worker?

Graboid behaviour

- ☐ Round of first surfacing. Round of first catch.
- ☐ Did worms pile onto one sector or node? How often?
- ☐ Did any worm submerge from two misses? Did players plan for that?
- ☐ Was "chase 1 node per round" too slow to matter?
- ☐ Did a tie for loudest node need a die roll? Did that feel arbitrary?

Encounter and rescue

- ☐ Was the Threatened → Grabbed → Dragged ladder understood after one explanation?
- ☐ Did Rescue tokens run out? Were any left unused at the end?
- ☐ Did buildings and towers get used as cover? Did "walls hold once" read clearly?
- ☐ Did anyone Fight? Why or why not?

Objectives and clock

- ☐ Which Essential was finished first, and by what round?
- ☐ Were Optional objectives ignored?
- ☐ Did the group Evacuate as soon as round 10 allowed, or push for more?
- ☐ Which calamity paragraph fired most — Quiet, Disturbed or Frenzy?

Board and components

- ☐ Nodes never visited. Routes never walked.
- ☐ Was the map readable at arm's length? Which labels were misread?
- ☐ How many noise cubes were on the board at the peak?
- ☐ Which calamity texts needed the translation table, and did the translation make sense?

KNOWN ISSUES GOING IN

These are already suspected. Confirm or dismiss them rather than rediscovering them.

1. **Round-1 surfacing.** Core Hunt ticks +1 in silence; all three worms surface at once. Variant V1 is the intended fix.
2. **Sector graph is almost complete.** Every sector touches nearly every other, so "move toward the loudest sector" converges everything in one round. Module M1 is the structural alternative; a sparser sector map is the cheap one.
3. **Sector E is only the cliff.** A worm in E can surface only at N32. Decide whether that is a feature (stampede gambit) or a bug.
4. **Objective placement.** *The Road Is Blocked* sits on N32 Cliff Edge because of a legacy ID; thematically it belongs at N02 Roadworks or N04. *Save the Horses* is at N06 Horse Path 1; *Meeting Point* at N14.
5. **Calamity text** still names the 14-node town (Horse Corral, Telephone Line, Bixby Road). Translation table in Appendix C. Note any card that becomes nonsense on the valley.
6. **Printed but unused stats:** Nerve, Defence, Binoculars. Decide whether to give them rules or strike them.
7. **Fight economics.** Fight + kill can be 12+ Noise. Burt may never shoot. Module M4 is one answer.
8. **Desperation** has no rule effect in Core. Either give it one (e.g. Desperation ≥ 3: Evacuate is forced at round 12) or remove it from the cards.

AFTER EACH GAME — 10 MINUTES

1. Result and round. Win/loss reason in one sentence.
2. Each player: the most tense moment; the most boring stretch; one rule they misapplied.
3. Group: which single change would most improve the next game?
4. Facilitator: rules questions that had no answer in this pack. Write them down verbatim.
5. Rate 1–5: *Tension*, *Agency* (my choices mattered), *Clarity*, *Tremors feel*, *Would play again*.

DECISION CRITERIA

Outcome	Action
Win rate under 30% across Session A	Reduce Essential Work by 1 or start with 5 Rescue tokens before testing modules.
Win rate over 70%	Raise Essential Work or move the Evacuate gate to round 12.
Games end before round 10 by loss	Reduce chase to 1 node on all bands (already Core) and test V1 earlier.
Module adds more than 3 minutes per Graboid phase	Cut or simplify it.
A rule needs re-explaining in game 2	Rewrite it; if still unclear in game 3, cut it.
A component is never touched in two games	Remove it from the pack.

Appendix A. Character Sheets

ONE PER PLAYER · MOVEMENT / NERVE / SEARCH / COMBAT

Val McKee

"I think we should all get the hell out while the getting's good."

SCOUT / MOVEMENT / IMPROVISATION

4

MOVEMENT

3

NERVE

3

SEARCH

3

COMBAT

Start: N14 Chang's Store

Weakness: Fragile under pressure. Critical after a second serious hit.

Fast. Move actions may take +1 space for +1 Noise.

Val's Luck. Once per round, reroll a failed test. If the reroll fails: +1 Noise.

Don't Wait Around. If you start a turn in an unsafe or threatened node, +1 Movement.

Signature (once per game) — Run!. Move up to 4 nodes immediately, ignoring extra terrain cost. Become Shaken.

When Injured: Loses 1 Movement.

2

SEARCH

3

COMBAT

Start: N14 Chang's Store

Weakness: Low specialist ability. Needs the others nearby to shine.

Earl Knows When to Run. Once per round, after another player makes Noise, move 1 node toward them for free.

Keep Moving. Spend an action to remove Shaken from another character at your node.

We're Going Together. Sharing a node: both gain +1 Nerve. If one is Injured, Earl becomes Shaken.

Signature (once per game) — Let's Get the Hell Out of Here. All characters at Earl's node may move 1 node with no extra Noise.

When Injured: Cannot assist two characters in one turn.

Rhonda LeBeck

“They can sense the slightest vibration through the ground. That’s how they see! That’s how they hunt!”

INTELLIGENCE / PREDICTION / GRABOID SPECIALIST

3 MOVEMENT	3 NERVE	5 SEARCH	2 COMBAT
---------------	------------	-------------	-------------

Start: N07 Horse Path 2

Weakness: Combat 2. She is not here to shoot Graboids.

Seismologist. When a Noise threshold is reached, look at the next Calamity and keep it or bury it.

I Know Where It Is. If a Tremor is at your node or sector, spend an action to reveal a Graboid there.

Don't Move. If you took no Move this turn, your next action this turn is 0 Noise.

Signature (once per game) — They're Under Us. Reveal all Graboids and Tremors in your sector. Move one underground Graboid to an adjacent sector.

When Injured: Seismologist may not bury cards.

Health ☐ Healthy ☐ Injured ☐ Critical ☐ ☐ Actions ☐ ☐ Shaken ☐ Pinned ☐ Signature used ☐

Threatened by ☐ G1 ☐ G2 ☐ G3 ☐ G4 Grabbed ☐

Burt Gummer

“Broke into the wrong goddamn rec room, didn't you, you bastard!”

HEAVY WEAPONS / DEFENCE / PREPARATION

2 MOVEMENT	4 NERVE	3 SEARCH	5 COMBAT
---------------	------------	-------------	-------------

Start: N29 Gummer Armory

Weakness: Heavy Equipment: +1 Noise when using equipment.

Prepared for Anything. Once per round, spend equipment to cancel an incoming attack or breach at your node.

Big Guns. May use heavy weapons. Heavy weapon Fight: extra +2 Noise.

Signature (once per game) — You Should Have Seen My Gun

Collection. Fight a surfaced Graboid with Combat +3 and no ammo cost. +5 Noise.

When Injured: Heavy equipment is harder to haul. Fight at -1.

Health ☐ Healthy ☐ Injured ☐ Critical ☐ ☐ Actions ☐ ☐ Shaken ☐ Pinned ☐ Signature used ☐

Threatened by ☐ G1 ☐ G2 ☐ G3 ☐ G4 Grabbed ☐

BURT'S KIT

Deal 3 at setup, Burt keeps 2. Each card can be discarded once for **Prepared for Anything**. Heavy weapons add +2 Noise to a Fight; Burt's weakness adds +1 for any equipment use.

Card	Kind	Heavy	Effect
Rifle	weapon	Yes	Fight with Combat +1. Heavy: +2 Noise.
Shotgun	weapon	Yes	Fight at the same node with Combat +2. Heavy: +2 Noise.
Explosives	weapon	Yes	Can wound a surfaced Graboid. +5 Noise spike.
Ammunition	supply		Reroll one Fight per game.
Binoculars	tool		Reveal Hunt level of Graboids in adjacent sectors.
Improvised Weapon	weapon		Anyone can Fight. No Combat bonus.

CONDITION REFERENCE

Condition	Effect	Cleared by
Shaken	+1 Noise on Move or Run (not careful).	Earl's Keep Moving; a full round without moving (house rule if needed).
Injured	1 action. Character-specific penalty (see sheet).	Aid with a Medkit.
Critical	0 actions. 2-round timer → dead.	Aid with a Medkit → Injured.
Pinned	Cannot move. 1 action.	Aid (no Medkit) or being pulled clear.
Threatened (by worm X)	Next catch by X = Grabbed.	X submerges or dies; you are pulled clear.
Grabbed	Injured, Pinned, only Struggle. Next catch = dead.	Rescue, Struggle, Line Rescue, worm dies.

Appendix B. Objective Deck

6 ESSENTIAL · 7 OPTIONAL · 4 CHARACTER · POKER SIZE, CUT ON DASHED LINES

OBJECTIVES17 CARDS

DECK SETUP

- Shuffle Essential, Optional and Character piles separately.
- Draw **3 Essential, 2 Optional, 1 Character**.
- Work on the printed node. Tick 1 per Work action.
- Every Work action is at least 1 Noise unless Rhonda's Don't Move or a Quiet Move token applies.
- Failure changes the board; it is not an instant loss.
- All Essentials done → Evacuate from **round 10**.

ESSENTIALWORK 2 · NOISE 1

THE ROAD IS BLOCKED

N32 CLIFF EDGE

Investigate the landslide. Perfection is not getting out the easy way.

PASS Reveal the blocked highway and unlock Find Another Way Out as known. Gain Alternative Route intel.

FAIL Permanent Danger Zone on the highway. Graboid Aggression +1.

ESSENTIALWORK 2 · NOISE 2

GET THE RADIO WORKING

N02 ROADWORKS / TEL CUT

The phone line to Bixby is dead. Splice it, or boost Walter's CB from the poles. Either way it makes a racket.

PASS Gain 1 Rescue token.

FAIL No outside help. Desperation +1 now, and +1 every 2 rounds.

ESSENTIALWORK 2 · NOISE 0

FIND RHONDA'S SEISMOGRAPH

N07 HORSE PATH 2

Horse Path 2 — the readings are wrong for earthquakes. That is the point.

PASS Learn a Graboid rule: they always investigate the greatest noise in their sector.

FAIL Blind Hunting: surfaced Graboids pick randomly among noisy nodes.

ESSENTIALWORK 2 · NOISE 3

SECURE A HEAVY VEHICLE

N22 BULLDOZER SITE

The Caterpillar is the only thing in town that weighs enough to matter.

PASS Loader ready for the valley.

FAIL Loader starts damaged. Repair still required to leave.

ESSENTIALWORK 2 · NOISE 0

FIND THE SAFE GROUND

N23 JUNKYARD

Dig through the dump to the old mining company foundations. Concrete and rock — Graboids cannot get purchase.

PASS Boulder paths, towers, and the junkyard foundations count as Solid Rock (Graboids cannot surface there).

FAIL Safe terrain stays hidden until someone stands on it.

ESSENTIAL

WORK 2 · NOISE 1

GET EVERYONE TO THE MEETING POINT

N14 CHANG'S STORE

If you split up forever, you die separately.

PASS Chang's Market becomes the Assembly Point. Starting together later is easier.

FAIL Survivors will scatter if you are forced out.

OPTIONAL

WORK 1 · NOISE 1

RAID CHANG'S MARKET

N14 CHANG'S STORE

Ammunition to antibiotics, Walter stocks it all. For now.

PASS Gain 2 Supply cards (Medical Kit and Distraction).

FAIL Place Looted. No further supplies here.

OPTIONAL

WORK 1 · NOISE 4

BURT'S ARSENAL

N29 GUMMER ARMORY

The basement is a museum of poor impulse control.

PASS Gain Explosives and Ammunition.

FAIL Burt will not leave without his equipment. He is stuck here until this is done or abandoned.

OPTIONAL

WORK 1 · NOISE 2

GATHER FUEL

N12 CHANG'S TRAILER

Without fuel, the loader is a very expensive rock.

PASS Gain 3 Fuel. Vehicle movement is available.

FAIL All vehicle / metal movement +1 Noise.

OPTIONAL

WORK 1 · NOISE 1

RECOVER THE MEDICAL SUPPLIES

N05 DR. JIM'S HOMESTEAD

Jim kept a kit. You are going to need it.

PASS Gain 2 Medical Kits.

FAIL Draw Injury: the next Knockdown on anyone is one step worse.

OPTIONAL

WORK 1 · NOISE 1

SAVE THE HORSES

N06 HORSE PATH 1

Horse Path 1 — the corral horses are quieter than any truck, until they spook.

PASS Gain 2 Quiet Movement tokens (a Move with 0 Noise).

FAIL Horses are gone.

OPTIONAL

WORK 1 · NOISE 2

SALVAGE THE TRAILER

N16 NESTOR'S TRAILER

Nestor's tin can might still hitch to the loader.

PASS People Carrier: the loader can take everyone.

FAIL Loader carries only 2 survivors at a time.

OPTIONAL

WORK 2 · NOISE 2

THE BASEMENT

N29 GUMMER ARMORY

Enclosed, valuable, and a dinner bell if you linger.

PASS Gain a powerful equipment piece (Explosives if missing, else Rifle).

FAIL Graboid breaches the building. Location becomes inaccessible.

CHARACTER

WORK 1 · NOISE 4

BURT — PREPARED

N29 GUMMER ARMORY · BURT GUMMER

Recover the ammunition and weapon stores.

PASS Arsenal card: Burt may Fight once per round without spending an action's extra noise beyond the gun itself.

FAIL Burt keeps only his personal weapon.

CHARACTER

WORK 1 · NOISE 0

RHONDA — SOMETHING DOESN'T ADD UP

N07 HORSE PATH 2 · RHONDA LEBECK

Collect enough seismic readings to pin down Graboid behaviour.

PASS Reveal two hidden Graboids' Hunt levels and sectors.

FAIL Graboids gain Unpredictable: Hunt checks sometimes skip a step.

CHARACTER

WORK 1 · NOISE 1

VAL & EARL — DON'T WAIT AROUND

N15 MELVIN'S SHACK · VAL MCKEE

Get Melvin off the street before his next prank calls in something real.

PASS Gain a Distraction token. Val and Earl may share one free Move this round.

FAIL Panic +1. NPCs generate +1 Noise if a Panic calamity hits.

CHARACTER

WORK 1 · NOISE 0

NANCY — WHERE'S MINDY?

N24 NANCY'S HOUSE · VAL MCKEE

Find Mindy and get her off the pogo stick.

PASS Mindy is safe. Gain 1 Quiet Movement.

FAIL Mindy stays Exposed in town. Pogo calamities hunt her.

Appendix C. Calamity Deck

30 CARDS · DRAW ON ROUNDS 4, 7, 10, 12, 14

NODE TRANSLATION TABLE

Calamity and objective text was written for the 14-node town. On the valley board read these names as follows. Where a card blocks a route, block the listed valley route.

Card says	Valley node	Card says	Valley node
Telephone Line / the radio	N02 Roadworks / Tel Cut	Chang's / Chang's Market / the store	N14 Chang's Store
Bixby Road / the highway	N32 Cliff Edge (valley exit)	Chang's Trailer / fuel	N12 Chang's Trailer
Horse Corral / the horses	N06 Horse Path 1	Water Tower	N13 Water Tower
Rhonda's Camp / seismograph	N07 Horse Path 2	Nestor's Trailer	N16 Nestor's Trailer
Junkyard / the Dump / workshop	N23 Junkyard	Nancy's House	N24 Nancy's House
Caterpillar / the loader / the CAT	N22 Bulldozer Site	Melvin's Place	N15 Melvin's Shack (or N20 Melvin's Trailer)
Burt's / Burt's house / the compound	N29 Gummer Armory	Jim & Megan's / the clinic	N05 Dr. Jim's Homestead
Route "Corral–Junkyard"	N06 ↔ N05 Dr. Jim's	Route "Dump–Bixby Road"	N30 Cat Path ↔ N19 Main St North
"one adjacent route" to Bixby Road	N32 ↔ N31 Cliff Approach	Sector C / "Burt's sector"	Sector C West Compound
Sector E / "south"	Sector E South Cliffs	Open ground beneath the Telephone Line	N04 Canyon Rd South

DECK ORDER

Act I (#1–10) shuffled on top · Act II (#11–25) shuffled beneath · Act III (#26–29) shuffled beneath that · **#30 Get Out of Perfection** on the bottom. Rounds 4 → Act I, 7 and 10 → Act II, 12 → Act III, 14 → #30. Rhonda's Seismologist may bury a card; a buried card goes under #30 and is never drawn.

On #30, read "one round remains" as "the game ends at the end of round 14".

Appendix C. Calamity Cards

30 CARDS · THREE ACTS

CALAMITY

30 CARDS

DECK SETUP

- Draw on rounds **4, 7, 10, 12, 14** only, after the Graboid phase.
- Stack Act I (1–10) over Act II (11–25) over Act III (26–29); **#30** at the bottom.
- Band from the round's noise total: **Quiet 0–8 · Disturbed 9–14 · Frenzy 15+**.
- Rhonda may peek and keep or bury the top card (Seismologist).
- Town names → valley nodes: see the translation table.

ACT 1 · #1

CALAMITY

THE ROAD IS BLOCKED

A landslide has done what the Graboids couldn't: it has cut the town off from Bixby.

QUIET (0–8)
Place a Blocked Route on the Bixby Road.

DISTURBED (9–14)
Block the Bixby Road and one adjacent route.

FRENZY (15+)
The Bixby Road closes. Essential: Find Another Way Out if the road objective is unfinished.

ACT 1 · #2

CALAMITY

STRANGE TREMORS

There are no earthquakes on Rhonda's readings. Whatever is moving down there isn't following the rules.

QUIET (0–8)
Place 1 Tremor marker.

DISTURBED (9–14)
Place 2 Tremors.

FRENZY (15+)
Nearest Graboid moves toward the highest-noise node and gains +1 Hunt.

ACT 1 · #3

CALAMITY

UNDERGROUND

Something passes beneath the town. You don't see it. You don't need to.

QUIET (0–8)
Place a Tremor marker.

DISTURBED (9–14)
Move one Graboid one sector.

FRENZY (15+)
All underground Graboids move toward the loudest sector.

ACT 1 · #4

CALAMITY

THE DEAD SHEEP

Word comes in from Old Fred's place south of town, on the Bixby road. His flock didn't wander off. Whatever did it left very little behind.

QUIET (0–8)
Reveal a clue at the Horse Corral.

DISTURBED (9–14)
Remove livestock / lose Quiet Movement if you had horses.

FRENZY (15+)
Aggression +1. The horses panic: Tremor at the Horse Corral.

ACT 1 · #5

CALAMITY

EDGAR'S PYLON

They found Edgar up an electrical tower outside town, rifle in hand, dead of thirst. Whatever chased him didn't have to follow him up.

QUIET (0–8)
Gain a Graboid behaviour clue.

DISTURBED (9–14)
Desperation +1.

FRENZY (15+)
Open ground beneath the Telephone Line is permanently Unsafe.

ACT 1 · #6

CALAMITY

TREMOR BREACH

The ground moves. Dirt sprays. Then the town remembers exactly what is under it.

QUIET (0-8)
Add a Tremor marker.

DISTURBED (9-14)
A Graboid in the loudest sector gains +2 Hunt.

FRENZY (15+)
A Graboid surfaces at the loudest node in its sector.

ACT 1 · #7

CALAMITY

THEY'RE LEARNING

The creatures aren't just following noise anymore. They're beginning to understand the pattern.

QUIET (0-8)
No effect.

DISTURBED (9-14)
Reveal one Graboid's Hunt level.

FRENZY (15+)
Adaptive: the next repeated Move style used gets +1 Noise.

ACT 1 · #8

CALAMITY

THE FOUNDATION

Being on top of something seemed like a good idea. Then the thing underneath started digging.

QUIET (0-8)
Buildings remain safe.

DISTURBED (9-14)
Mark one occupied building Compromised.

FRENZY (15+)
An occupied building becomes Unsafe. Survivors there must leave next turn or be Exposed.

ACT 1 · #9

CALAMITY

POWER FAILURE

The lights flicker. Then everything goes dark. Somewhere nearby, something starts moving.

QUIET (0-8)
Disable one powered location (Chang's or Chang's Trailer).

DISTURBED (9-14)
Disable Chang's, Chang's Trailer, and the Telephone Line.

FRENZY (15+)
Darkness: all actions +1 Noise until someone Works at Chang's Trailer.

ACT 1 · #10

CALAMITY

THE REFRIGERATOR

Nobody notices the refrigerator until it starts running. Suddenly that hum sounds like a dinner bell.

QUIET (0-8)
Chang's generates +1 Noise next round.

DISTURBED (9-14)
Chang's generates +2 Noise next round.

FRENZY (15+)
Nearest Graboid moves toward Chang's and gains +1 Hunt.

ACT 2 · #11

CALAMITY

WHERE'S MINDY?

Someone hears music. Someone else hears a pogo stick. Everyone else hears disaster.

QUIET (0-8)
Place Mindy at Nancy's House.

DISTURBED (9-14)
Mindy moves toward open ground (the Horse Corral).

FRENZY (15+)
Mindy is Exposed at the Horse Corral. Nearest Graboid hunts her.

ACT 2 · #12

CALAMITY

THE POGO STICK

It doesn't matter how often everyone says stop jumping.

QUIET (0-8)
No effect.

DISTURBED (9-14)
+2 Noise at Mindy's location.

FRENZY (15+)
+4 Noise at Mindy and nearest Graboid moves toward her.

ACT 2 · #13

CALAMITY

THE BARBED WIRE

The corral fence has come down across the safest route through town.

QUIET (0-8)
Hazard on Horse Corral routes.

DISTURBED (9-14)
Crossing the Horse Corral costs +1 extra Move point.

FRENZY (15+)
Crossing the Horse Corral: 50% chance of Injured.

ACT 2 · #14

CALAMITY

CHANG'S MARKET

The market is supposed to be where everyone gathers. That feels less reassuring.

QUIET (0-8)
Chang's remains safe.

DISTURBED (9-14)
Chang's is a High-Value Noise Location (+1 to actions there).

FRENZY (15+)
Graboid under Chang's. Everyone there must flee or become Threatened.

ACT 2 · #15

CALAMITY

NO SIGNAL

The radio crackles, then nothing. Bixby is 38 miles away. It may as well be 380.

QUIET (0-8)
No effect.

DISTURBED (9-14)
Radio objective needs +1 extra Work.

FRENZY (15+)
Radio objective fails unless already completed.

ACT 2 · #16

CALAMITY

BURT'S ARSENAL

Burt prepared for everything. Giant underground predator was not on the list.

QUIET (0-8)
Burt gains a Rifle if he has none.

DISTURBED (9-14)
Burt gains a weapon and +2 Noise at his house.

FRENZY (15+)
Weapon cache: gain Explosives, then a Graboid response in sector C.

ACT 2 · #17

CALAMITY

THE TUMBLER

Burt's ammunition is getting polished. Heather has noticed something in the distance.

QUIET (0-8)
No consequence.

DISTURBED (9-14)
Machine Running: +1 Noise at Burt's each round until someone Works to stop it.

FRENZY (15+)
A Graboid moves directly to sector C and gains +1 Hunt.

ACT 2 · #18

CALAMITY

WRONG HOUSE

The creatures don't know where everyone is hiding. They're trying buildings at random. For now.

QUIET (0-8)
Nothing.

DISTURBED (9-14)
A random occupied building becomes Threatened.

FRENZY (15+)
Graboid surfaces at the most occupied building's sector, targeting that node.

ACT 2 · #19

CALAMITY

THE TRAILER

Nestor's trailer looked like shelter. The Graboids have another opinion.

QUIET (0-8)
No effect.

DISTURBED (9-14)
Trailer becomes Compromised.

FRENZY (15+)
Trailer destroyed. Anyone there is Exposed and Shaken.

ACT 2 · #20

CALAMITY

THE WATER TOWER

The town suddenly has an excellent view. So does the thing underneath.

QUIET (0-8)
Water Tower is a safe observation point.

DISTURBED (9-14)
Climbing it costs +1 Move.

FRENZY (15+)
Tower Compromised. Graboid +1 Hunt in sector C.

ACT 2 · #21

CALAMITY

A DECOY

Sometimes the best way to survive a Graboid is to persuade it somebody else is more interesting.

QUIET (0-8)
Gain a Distraction token.

DISTURBED (9-14)
Gain a Distraction and a Tremor.

FRENZY (15+)
Redirect one Graboid, then another Graboid gains +1 Hunt.

ACT 2 · #22

CALAMITY

THE DEEPENING SILENCE

Everything goes quiet. Nobody talks. Nobody moves. Somewhere below, something waits.

QUIET (0-8)
Remove 1 Noise from the loudest node.

DISTURBED (9-14)
Each character must Hide or lose their next first action.

FRENZY (15+)
Ambush: nearest hidden Graboid +2 Hunt before anyone acts.

ACT 2 · #23

CALAMITY

THE GROUND GIVES WAY

A patch of earth collapses. The town has one less piece of itself.

QUIET (0-8)
Block a minor route (Corral-Junkyard).

DISTURBED (9-14)
Block Dump-Bixby Road.

FRENZY (15+)
Block Dump-Bixby Road and create a Graboid entrance in sector E.

ACT 2 · #24

CALAMITY

PANIC

Stay and hope, or run and hope. Neither sounds good.

QUIET (0-8)

Nothing.

DISTURBED (9-14)

Desperation +1. Shaken on one random character.

FRENZY (15+)

All Exposed characters generate +1 Noise. Nearest Graboid activates.

ACT 2 · #25

CALAMITY

THE BOMBS

Burt doesn't call them bombs.

QUIET (0-8)

Gain Explosives.

DISTURBED (9-14)

Gain Explosives and +2 Noise at Burt's.

FRENZY (15+)

Gain Explosives and trigger a Feeding Frenzy response.

ACT 3 · #26

CALAMITY

BROKE INTO THE WRONG PLACE

The creature picks the wrong building. Then everyone inside makes it regret that.

QUIET (0-8)

If Burt is in a building, he gains Prepared.

DISTURBED (9-14)

Repel: Hunt -1 on a surfaced Graboid, or +1 Wound if none.

FRENZY (15+)

If Burt is present at a surfaced Graboid, he may destroy it for +3 Noise.

ACT 3 · #27

CALAMITY

THEY'RE TESTING US

First the store. Then the houses. Then the trailer. The next target won't be random.

QUIET (0-8)

Reveal the next Calamity title.

DISTURBED (9-14)

Reveal next Calamity and one Graboid sector.

FRENZY (15+)

Choose: bury the next Calamity, or a Graboid surfaces at the loudest node.

ACT 3 · #28

CALAMITY

THE CATERPILLAR

Thirty tons of machinery is looking less like construction equipment and more like a lifeboat.

QUIET (0-8)

Reveal Loader location (already known). +1 Fuel.

DISTURBED (9-14)

Loader requires repair: extra Work on the vehicle objective.

FRENZY (15+)

Loader damaged. Metal movement +2 Noise until repaired.

ACT 3 · #29

CALAMITY

NO WAY BACK

Perfection was never easy to leave. Now the town is refusing to let anyone go.

QUIET (0-8)

Block one remaining Bixby Road route.

DISTURBED (9-14)

Block two south routes.

FRENZY (15+)

All unfinished Essential objectives become Urgent (must complete this round or fail).

ACT 3 · #30

CALAMITY

GET OUT OF PERFECTION

There comes a point where staying isn't brave anymore. It's just stupid.

QUIET (0-8)

Final warning. One round remains after this.

DISTURBED (9-14)

Evacuation begins. Unfinished optional objectives are abandoned.

FRENZY (15+)

PERFECTION FALLS. Unfinished Essentials fail. Resolve the end of Phase 1 now.

Appendix D. Item Deck, Rigs and Burt's Kit

16 ITEMS (TWO OF EACH) · 5 RIG REFERENCE CARDS · 6 KIT CARDS

ITEMS

16 ÷ 5 ÷ 6

SEARCH DECK SETUP

- Shuffle the 16 item cards face down.
- Search success (d6 + Search + node S ≥ 9) draws the top card into the shared supply.
- Anyone may use a supply item on their turn: one action, at least 1 Noise.
- A **Rig** spends two named items as one action. Keep the 5 rig cards face up as a reference.
- Burt's 6 kit cards are a separate pile: deal 3, keep 2.

ITEM

SEARCH DECK

TIN CANS

SHARED SUPPLY · USE IS AN ACTION (FLOOR 1 NOISE)

ALONE Throw +2 Noise onto an adjacent node. Cheap diversion.

RIGS Tripwire Bait (+ Fishing Line)

1/2

ITEM

WALKIE-TALKIES

SHARED SUPPLY · USE IS AN ACTION (FLOOR 1 NOISE)

ALONE The next character in turn order gains +1 action this round.

RIGS Line Rescue (+ Rope)

2/2

RIG

REFERENCE

PIPE BOMB

PIPE + BLACK POWDER

1 wound on a surfaced Graboid here or adjacent. No fight roll. +4 Noise.

COST One action. Both parts leave the supply.

RIG

REFERENCE

TRIPWIRE BAIT

TIN CANS + FISHING LINE

The next Graboid surfaces at a node you choose, with no ambush.

COST One action. Both parts leave the supply.

RIG

REFERENCE

FIRE BOMB

FUEL CAN + BLACK POWDER

Force a surfaced Graboid here to dive at Hunt 1. +5 Noise.

COST One action. Both parts leave the supply.

RIG

REFERENCE

LINE RESCUE

ROPE + WALKIE-TALKIES

Pull a Grabbed or Threatened teammate from an adjacent node onto yours.

COST One action. Both parts leave the supply.

RIG

REFERENCE

FIELD GENERATOR

RADIO PARTS + FUEL CAN

Clear Power Failure and Darkness. Dump 2 lingering noise here.

COST One action. Both parts leave the supply.

BURT'S KIT

HEAVY

RIFLE

DEAL 3, KEEP 2

Fight with Combat +1. Heavy: +2 Noise.

PREPARED Discard to cancel one attack or breach at Burt's node (once per round).

BURT'S KIT

HEAVY

SHOTGUN

DEAL 3, KEEP 2

Fight at the same node with Combat +2. Heavy: +2 Noise.

PREPARED Discard to cancel one attack or breach at Burt's node (once per round).

BURT'S KITHEAVY

EXPLOSIVES

DEAL 3, KEEP 2

Can wound a surfaced Graboid. +5 Noise spike.

PREPARED Discard to cancel one attack or breach at Burt's node (once per round).

BURT'S KITSUPPLY

AMMUNITION

DEAL 3, KEEP 2

Reroll one Fight per game.

PREPARED Discard to cancel one attack or breach at Burt's node (once per round).

BURT'S KITTOOL

BINOCULARS

DEAL 3, KEEP 2

Reveal Hunt level of Graboids in adjacent sectors.

PREPARED Discard to cancel one attack or breach at Burt's node (once per round).

BURT'S KITWEAPON

IMPROVISED WEAPON

DEAL 3, KEEP 2

Anyone can Fight. No Combat bonus.

PREPARED Discard to cancel one attack or breach at Burt's node (once per round).

Appendix E. Graboid Behaviour Deck

12 CARDS · MODULE M5 ONLY · ADAPTED FROM THE GEMINI MOVEMENT SPEC

BEHAVIOUR

MODULE M5

DECK SETUP

- Only with Module M5.
- Shuffle all 12 cards.
- On any round with a **Disturbed** or **Frenzy** total, draw one after band movement and before Hunt ticks.
- Resolve **Seismic** (map change) first, then **AI** for this Graboid phase only.
- Discard after use. Reshuffle when empty.

BEHAVIOUR

DUAL · AI / SEISMIC

SENSORY ADAPTATION

SEISMIC — RESOLVE FIRST

Noise spillover reaches one node further this round (M2), or +1 to every sector total (Core).

AI — THIS PHASE

Graboids ignore nodes holding 1 Noise. They target only nodes with 2+.

1/3

BEHAVIOUR

DUAL · AI / SEISMIC

SENSORY ADAPTATION

SEISMIC — RESOLVE FIRST

Noise spillover reaches one node further this round (M2), or +1 to every sector total (Core).

AI — THIS PHASE

Graboids ignore nodes holding 1 Noise. They target only nodes with 2+.

2/3

BEHAVIOUR

DUAL · AI / SEISMIC

SENSORY ADAPTATION

SEISMIC — RESOLVE FIRST

Noise spillover reaches one node further this round (M2), or +1 to every sector total (Core).

AI — THIS PHASE

Graboids ignore nodes holding 1 Noise. They target only nodes with 2+.

3/3

BEHAVIOUR

DUAL · AI / SEISMIC

BLIND CHARGE

SEISMIC — RESOLVE FIRST

The loudest node takes 1 Erosion (M3) or becomes Unsafe (Core).

AI — THIS PHASE

Each surfaced Graboid ignores prey and charges 4 nodes in a straight line along routes, breaching any building it ends on.

1/2

BEHAVIOUR

DUAL · AI / SEISMIC

BLIND CHARGE

SEISMIC — RESOLVE FIRST

The loudest node takes 1 Erosion (M3) or becomes Unsafe (Core).

AI — THIS PHASE

Each surfaced Graboid ignores prey and charges 4 nodes in a straight line along routes, breaching any building it ends on.

2/2

BEHAVIOUR

DUAL · AI / SEISMIC

SUBTERRANEAN AMBUSH

SEISMIC — RESOLVE FIRST

Fault Line Collapse: choose two non-adjacent Exposed Dirt nodes; they count as a fault line for the rest of the game.

AI — THIS PHASE

Underground Graboids do not move. The next character to enter any Exposed Dirt node is caught by the nearest one, which surfaces there.

1/2

BEHAVIOUR

DUAL · AI / SEISMIC

SUBTERRANEAN AMBUSH

SEISMIC — RESOLVE FIRST

Fault Line Collapse: choose two non-adjacent Exposed Dirt nodes; they count as a fault line for the rest of the game.

AI — THIS PHASE

Underground Graboids do not move. The next character to enter any Exposed Dirt node is caught by the nearest one, which surfaces there.

2/2

BEHAVIOUR

DUAL · AI / SEISMIC

TENTACLE PROBE

SEISMIC — RESOLVE FIRST

Rockslide: one Safe Boulder node of your choice becomes Exposed Dirt for the rest of the game.

AI — THIS PHASE

Surfaced Graboids target the nearest human instead of noise, and may catch a character on an adjacent node without moving.

1/3

BEHAVIOUR

DUAL · AI / SEISMIC

TENTACLE PROBE

SEISMIC — RESOLVE FIRST

Rockslide: one Safe Boulder node of your choice becomes Exposed Dirt for the rest of the game.

AI — THIS PHASE

Surfaced Graboids target the nearest human instead of noise, and may catch a character on an adjacent node without moving.

2/3

BEHAVIOUR

DUAL · AI / SEISMIC

TENTACLE PROBE

SEISMIC — RESOLVE FIRST

Rockslide: one Safe Boulder node of your choice becomes Exposed Dirt for the rest of the game.

AI — THIS PHASE

Surfaced Graboids target the nearest human instead of noise, and may catch a character on an adjacent node without moving.

3/3

BEHAVIOUR

DUAL · AI / SEISMIC

GROUND SUBSIDENCE

SEISMIC — RESOLVE FIRST

One Micro-Safe Roof of the players' choice collapses into Exposed Dirt permanently.

AI — THIS PHASE

Graboids lose their target. Each underground token drifts one sector (or node, M1) toward the town centre (sector B / N18).

1/2

BEHAVIOUR

DUAL · AI / SEISMIC

GROUND SUBSIDENCE

SEISMIC — RESOLVE FIRST

One Micro-Safe Roof of the players' choice collapses into Exposed Dirt permanently.

AI — THIS PHASE

Graboids lose their target. Each underground token drifts one sector (or node, M1) toward the town centre (sector B / N18).
